February 9, 1920.

Dr. F. W. Blankenship,
2525 Hilgard Ave.,
Berkeley, Calif.

My dear Sir:

I have your letter of January 20 and the very satisfactory specimens which you sent. I am sending you by express prepaid 631 sheets of plants mostly from Southern California, but to complete the sets, I had to use about 20 sheets of duplicate grass material from the Rocky Mountain region. I hope that this set will be satisfactory.

We have sets of Nicaragua material numbering about 150 sheets, which are available for exchange, but I feel that they are worth more than the same number of sheets of plants collected locally. If you are interested in them, I shall be glad to exchange a set for Utah or Ozark plants.

Very truly yours,
